EXPERIENCE

Entegra Bilişim Sync Teknoloji A.Ş. • Avcilar / Istanbul • Jan 2023- Present
Software Developer

- As a Frontend Developer at Entegra Bilişim for the past year, I have single-handedly designed the front-end of a website using React. This role involved extensive work on crafting a user-friendly interface, ensuring the website's responsiveness, and implementing interactive features. My responsibilities also included collaborating closely with the backend team to integrate APIs and optimize the website's performance. Additionally, alongside my main project, I engaged in a separate project where I provided support in resolving bugs using C#, demonstrating my versatility and problem-solving skills in software development. This involvement showcased my ability to efficiently handle multiple tasks and contribute to different aspects of software engineering.

Ziraat Teknoloji • Esenler / Istanbul • Jul 2022- Aug 2022
